

DataRescue New Haven @ Yale

March 4, 2017
#DataRescueNHV

DataRescue New Haven @ Yale is an effort to identify, download, and preserve federal research data to ensure ongoing access by scholars, policymakers, journalists, and the public.

There are many ways to participate in a DataRescue event and everyone is welcome. **Programming skills are not required.** When you arrive at DataRescueNHV, Guides will help you choose a path:

- **Seeding & Sorting:** Feed the End of Term Archive
- **DataRefuge:** Participate in interconnected groups that get “uncrawable” data into DataRefuge
- **Documentation & Storytelling:** Share stories about the event and about the importance of data access and archiving
- **The Long Trail:** Help build a sustainable future for DataRefuge

More details about DataRescue paths, roles, and needed skills are available at <http://www.ppehlab.org/datarefugepaths>.

The DataRescue New Haven @ Yale event is modeled on similar DataRescue events happening around the United States and inspired by the DataRefuge movement organized by EDGI and Penn’s Program in the Environmental Humanities. The organizers of DataRescueNHV are grateful for the support and documentation provided by PPEH (<http://www.ppehlab.org/>).

**Saturday, March 4, 2017, 9 a.m.-4 p.m.
TEAL Classroom, 17 Hillhouse Avenue**

*Please bring your own laptop.
Refreshments will be provided.*
